## Swinging and Sliding Gates

---

### Gate Specification

 Secure Empty Property

**Dear Customer,**

We would like to thank you for your interest in using Secure Empty Property for your site security requirements.

We have detailed below the various gate set-ups we have available, whether they be for vacant site protection or event site security.

All our gates can be used in conjunction with our barrier blocks ensuring rapid installation.

Our gates can be used to allow access to sites for maintenance works or to create holding areas for vehicle checks.

The standard opening widths for the gates are 3m and 5m but other options are available depending on your specific requirements.

Our gates are all galvanised.

**Swing Gates**

Our swing gates can be incorporated into several barrier layouts making them extremely versatile for use in both the events industry and for site protection.

**Small Swing Gate (standard 3m opening).**

**Large Swing Gate (standard 5m opening).**

## Sliding Gates.

Our sliding gates have a standard opening of 5m however, this can be narrowed by moving the barrier blocks closer together.

### Sliding Gate (standard 5m opening).
