

CONCRETE BARRIER HIRE

DELIVERY AND INSTALLATION INFORMATION

 Secure Empty Property

Dear Customer,

We would like to thank you for your interest in using Secure Empty Property for your deterrent block requirements.

We have access to various vehicles and machinery to aid in the delivery and installation of our barrier blocks and security gate system (which can be used in conjunction with our barrier blocks).

All of our drivers are licensed to operate our machinery and have regular refresher training so you can be confident your delivery will be safe and efficient.

The total number of blocks we can carry on a single load depends on; the type of RDB block selected, if you have plant on site for unloading/loading or if the blocks require lifting over a gate for example.

The table below shows the maximum number per load we can carry for each size of RDB (Rapid Deployment Barrier) and each delivery vehicle.

The RDB XL barrier block can only be delivered using our crane lorry (HIAB).

The moffett is our rear mounted forklift which sits on the back of our trailers.

RDB Type	Dimensions	Weight (approx.)	Articulated lorry with moffett	HIAB lorry	Customer able to unload vehicle
MKI	2500 x 500 x 750mm	2250kg	10	4	12
MKII	3000 x 450 x 750mm	2400kg	10	4	11
MKXL	4250 x 700 x 750mm	5000kg	N/A	2	N/A

We also have a JCB Loadall which can be used for installations on uneven land such as building sites or heavy ground.
